### **DETAILED ACTION**

## Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, and 5-7 are rejected under 35 U.S.C. 102(b) as being anticipated by Ying (US Patent 6,353,443).

Ying discloses, in figure 3, an inverted-F antenna comprising a substrate 320, a printed spiral or vortical structure 315 formed on the upper surface of the substrate, a ground metal formed on the lower surface of the substrate, not shown in number, where the ground post or short circuit leg 335 is electrically connected, and a feed leg 325. The patent to Ying al so teaches that the length of the spiral structure is ¼ wavelength of the frequency band, column 4, lines 45-48. The increasing the encircling number of the vortical or spiral structure to make the wavelength of the frequency signal longer and thus reduce a resonance frequency band is inherent.

# Allowable Subject Matter

- 3. Claims 2-4 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
- 4. Claims 8-13 are allowed.

Application/Control Number: 10/722,539 Page 3

Art Unit: 2821

5. Claims 2 and 8 recite a terminal micro strip which is fabricated on the lower surface of the substrate and electrically connected to the open circuit end of the vortical structure through a conductive aperture. The patents to Ying does not teach this terminal micro strip.

6. The patents to Ollikainen et al, Hirabayyashi, Niu et al, Glenn et al, and Chen et al are cited as of interest showing the antenna similar to that disclosed.

#### Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tan Ho whose telephone number is (571) 272-1822. The examiner can normally be reached on M-F (8:00AM - 5:00PM).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Don Wong can be reached on (571) 272-1834. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
